

# EXHAUSTIVE ANALYSIS OF INDIAN AGRICULTURE USING POWER BI

## INTERNSHIP PROJECT REPORT(DAY-1)

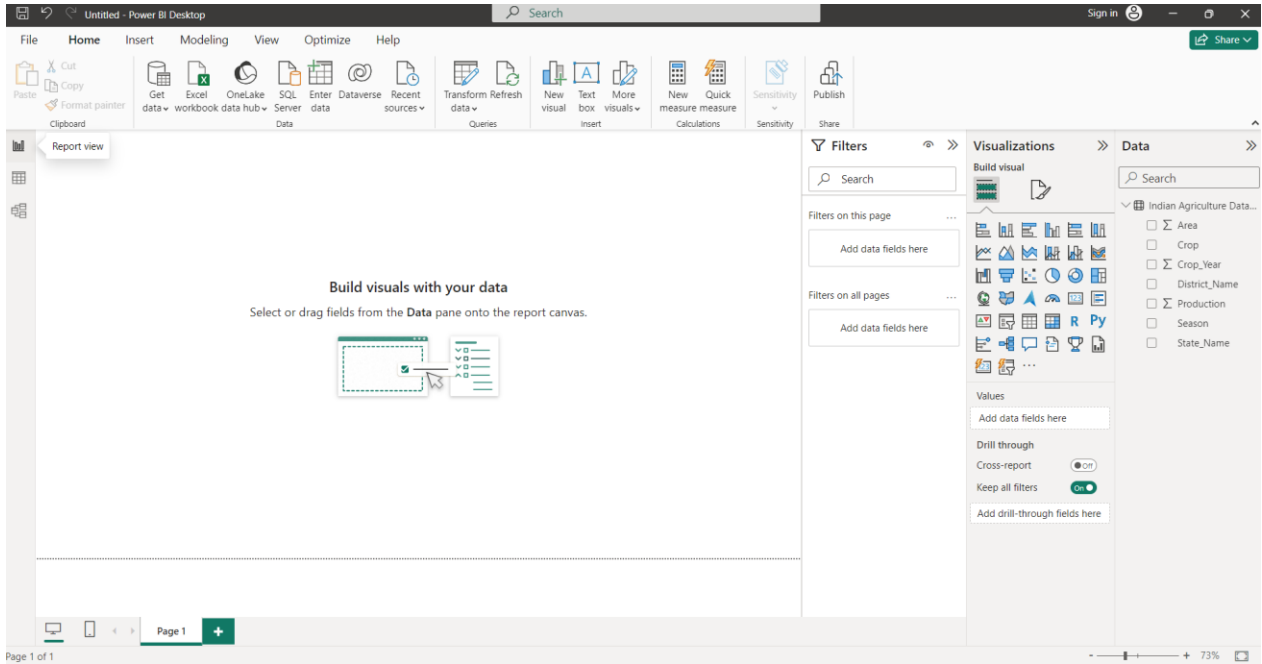

**STEP1:** Extract the data from data source (excel, CSV, text, database file) using power Bi

**STEP2:** Transform the data (preprocessing and data cleaning). Removed Null values, blank spaces and unnecessary columns.

STEP3: Load the cleaned data for data analysis. We can see the report view also below attached image.

STEP4: Table view and report View
